

Postman: Create Assignment API

Method: POST

URL: http://localhost:3000/api/assignments

Authorization

Postman → Authorization → Type: Bearer Token → paste your Teacher / School Admin / Super Admin JWT.

Body

Select Body → form-data. Do NOT use raw JSON because the request supports a file upload.

KEY	TYPE	VALUE	REQUIRED
title	Text	Mathematics Assignment	Yes
description	Text	Complete Chapter 5 questions	No
className	Text	Grade 10	Yes
section	Text	A	No
subject	Text	Mathematics	Yes
dueDate	Text	2026-09-05T23:59:00	Yes
maxMarks	Text	100	No
attachment	File	assignment.pdf	No

Important: For attachment, change the row type from Text to File, then select the PDF. The key must be exactly **attachment** because Multer uses .single("attachment").

Do not send: teacherId or status. teacherId comes from the authenticated user, and status defaults to published.

Final request: Click Send. A successful response should contain success: true and "Assignment created successfully."
